PROGRAM CHAIR

Adam Finkle, Coastal Scientist
Woods Hole Group, Inc.
107 Waterhouse Road, Bourne, MA 02532
(508) 495-6272 | afinkle@whgrp.com

Mr. Adam Finkle is a Coastal Scientist with the Woods Hole Group, focused on designing, permitting, and facilitating the implementation of ecological restoration and coastal resiliency projects throughout New England. His work involves identifying key vulnerabilities and developing effective adaptation strategies for coastal communities, non-profit organizations, and private homeowners. Mr. Finkle is familiar with the local Conservation Commission permitting process as well as State and Federal environmental permitting. As a Professional Wetland Scientist (PWS) and Certified Ecological Restoration Practitioner (CERP), he has experience conducting coastal resource area delineations, wetland delineations, and developing restoration planting plans. Mr. Finkle earned an M.S. in Sustainability Science from the University of Massachusetts, Amherst.

SPEAKERS

Brynna McGlathery, Reservation Coordinator
Duxbury Beach Reservation, Inc.
P.O. 2593, Duxbury, MA 02331
973-459-8890 | brynna@duxburybeachreservation.org

Ms. McGlathery is the Reservation Coordinator for the Duxbury Beach Reservation. Prior to working with the Reservation, Brynna worked as the Field Coordinator for the Mass Audubon Coastal Waterbird Program, as a shorebird technician for the Massachusetts Trustees of Reservations, and with the Rachel Carson National Wildlife Refuge. She is responsible for the oversight of all facets of the Endangered Species Program on Duxbury Beach, coordinating the efforts of the Mass Audubon Coastal Waterbird Program and the Town of Duxbury Endangered Species Program. As Reservation Coordinator, Ms. McGlathery is responsible for reporting to the Duxbury Conservation Commission as it relates to beach operations, providing and coordinating outreach and educational materials to the public, and assisting in oversight and permitting of maintenance work on Duxbury Beach. Ms. McGlathery holds a B.S. in Biology and Environmental Science from Tufts University.

High Pines

This program will be hosted at a rustic outbuilding called High Pines on the back side of the barrier beach. The facility has bathroom facilities, electricity, and WiFi, but no potable water. Please plan accordingly.

Site Visit Safety

This program includes a visit to a recently completed project. Please be prepared to walk for approximately 1-mile over loose sand and gravel. Please bring along appropriate footwear, warm layers, and a rain jacket.

Driving Directions

It is recommended that program participants take Exit 11 off of Route 3, continue on Route 14 through the Town of Duxbury, and cross the Powder Point Bridge to access Duxbury Beach. Once you have crossed the Powder Point Bridge, take a right and continue down the dirt access road for approximately 1 mile. Please follow the signs to High Pines, which is located on the left-hand side of the road.
